CARBOHYDRATE RESEARCH, VOL. 178 (1988)

SUBJECT INDEX

Aceanthamoeba castellanii, removal of ester-bound fatty acyl residues from *Salmonella* lipopolysaccharide by enzymes from, 225
N-Acetyl-α-D-galactosaminyltransferase, substrate recognition by, 259
N-Acetylgalactosaminyltransferase, substrate specificity of, 259
N-Acetyllactosamine specificity of *Ricinus communis* agglutinin, 233
Acofriose, isolation from blood-group active proteoglycan of *Osmunda japonica* of, 320
Agglutinin of *Ricinus communis*, *N*-acetyllactosamine specificity of, 233
Agglutinin of soybean, chemical modification of, 183
Amniotic mucins, human, structural studies of oncofetal carbohydrate antigens from, 29
Antibodies anti-Le^a, hybridoma monoclonal, binding of Le^a human blood group determinant by, 293
Antibodies, monoclonal, specific for two epitopes of *Citrobacter* O36 lipopolysaccharide, 233
Antibodies, monoclonal, with Le^a, Le^b, SSEA-1 specificities, ^{1}H-n.m.r. and conformational studies of, 67
Antigens, oncofetal carbohydrate, CA 19-9, CA 50, and CA 125, structural studies of, 29

B-like blood group, I-active (polyglycosyl)-ceramides, structure elucidation of, 1
Blood group A erythrocytes, human, structure of the glycolipids containing eight and nine sugar residues from, 111
Blood-group B, breast-fed infant, isolation of oligosaccharides from faeces of, 145
Blood group determinant, H Type 1, analysis of mouse monoclonal antibody detecting, 333

Calf pancreas, isolation and partial purification of lipid-linked oligosaccharides from, 49
Cancer-associated sialyl-x antigen, biosynthesis by (1→3)-α-L-fucosyltransferase of, 23
Carbohydrate–peptide bond, *N*-glycosylamide, reduction cleavage of, 155
Carbohydrate side-chains of mucus glycoproteins, role in gel formation of, 93
Carcinomas, human, characterization and specific activity of blood group glycoproteins from, 271
Citrobacter O36, monoclonal antibodies specific for two epitopes of the lipopolysaccharide of, 233

Density-gradient analysis of oxidised ovarian cyst mucins, 314
4-Deoxy-2-hexulosonic acid, isolation from capsular K3 antigen of *Escherichia coli* O4:K3:H4 and structure of, 191

Eight-sugar glycolipids from human blood group A erythrocytes, structures of, 111
Endoglycosidase F, effect on surface components of the human erythrocyte of, 203
Erythrocyte, human, effect of endoglycosidase F–peptidyl *N*-glycosidase F, on surface components of, 203
Erythrocyte survival in circulation, rat, effect of glycosidases on, 307
Erythrocytes, human characterization and specific activity of Rn blood group glycoproteins from, 271
Escherichia coli O4:K3:H4, isolation of 4-deoxy-2-hexulosonic acid from capsular K3 antigen of, 191

Faeces of blood-group B, breast-fed infant, isolation of oligosaccharides from, 145
Fatty acyl residues of *Salmonella* polysaccharides, ester-bound, removal by enzymes from *Acanthamoeba castellanii* of, 225
Frontal-affinity chromatography, quantitative analysis of mucin-type sugar-chain binding lectins, 213
Fucogangliosides, novel, cancer-associated, structure of, 121
Fucosyloligosaccharides with Le^a, Le^b, and SSEA-1 specificities, ^{1}H-n.m.r. and conformational studies of, 67
(1→3)-α-L-Fucosyltransferase, biosynthesis of cancer-associated sialyl-x-antigen by, 23

Ganglioside, fuco-, structure of, 121
Gel formation of mucus glycoprotein, 93
Glycolipids containing eight and nine sugar residues from human blood group A erythrocytes, structures of, 111
Glycoprotein, ovarian cyst, oxidised density-gradient analysis of, 314
N-Glycosidase, peptidy^1, effect on surface components of the human erythrocyte of, 203
Glycosidases, effect on rat erythrocyte survival in circulation of, 307
N-Glycosylamide carbohydrate–peptide bond, reductive cleavage of, 155

^{1}H-N.m.r. analysis of lactogangliosides, 121
H Type 1 blood group determinant, analysis of mouse monoclonal antibody detecting, 333
Hemagglutinin of influenza virus, structures of the carbohydrate chains of, 165
2-Hexulosonic acid, 4-deoxy-, isolation from capsular K3 antigen of *Escherichia coli* O4:K3:H4 and structure of, 191
High-mannose oligosaccharide of Tamm–Horsfall glycoprotein, structure of, 327
Human milk oligosaccharides, separation of, 79
Hybridoma monoclonal antibodies, binding of Le^a human blood group determinant by, 293

I-Active (polyglycosyl)ceramide of rabbit red cells, structure elucidation of, 1
Influenza virus hemagglutinin, structures of the carbohydrate chains of, 165

Lacto-*N*-*neo*-difucohexaose II, isolation from human milk of, 79
Lactogangliosides, ^{1}H-n.m.r. analysis of, 121
Lectin of soybean, chemical modification of, 183
Lectins, mucin-type sugar chain-binding, quantitative analysis by frontal-affinity chromatography, 213
Lewis-a human blood group determinant, binding by two hybridoma monoclonal antibodies of, 293
Lipid-linked oligosaccharides from calf pancreas, isolation and partial purification, 49

3-*O*-Methyl-rhamnose, isolation from blood-group active proteoglycan of *Osmunda japonica* of, 320
Milk, human, separation of oligosaccharides of, 79
Monoclonal antibodies specific for two epitopes of *Citrobacter* O36 lipopolysaccharide, 233
Monoclonal antibodies with specificities related to Le^a, Le^b, and SSEA-1, fucosyloligosaccharides recognized by, 67
Monoclonal antibody detecting H Type 1 blood group determinant from mouse, analysis of, 333
Mucin, ovarian cyst, oxidised, density-gradient analysis of, 314
Mucin-type sugar chain-binding lectins, quantitative analysis by frontal-affinity chromatography, 213
Mucus glycoprotein, gel formation of, 93

Nine-sugar glycolipids from human blood group A erythrocytes, structures of, 111

Octasaccharide component of Tamm-Horsfall glycoprotein, structure of, 327
Oligosaccharides from faeces of blood-group B, breast-fed infant, isolation of, 145
Oligosaccharides, lipid-linked, isolation and partial purification from calf pancreas, 49
Oncofetal carbohydrate antigens, CA 19-9, CA 50, and CA-125, structural studies of, 29
Osmunda japonica, isolation of 3-*O*-methylrhamnose from blood-group active proteoglycan of, 320
Ovarian cyst mucins, oxidised, density-gradient analysis of, 314

Peptidyl *N*-glycosidase, effect on surface components of the human erythrocyte of, 203
Polymeric structure of mucus glycoprotein, role in gel formation of, 93

Rabbit red cell I-active (polyglycosyl)ceramides, structure elucidation of, 1
Rat erythrocyte survival in circulation, effect of glycosidases on, 307
Reductive cleavage of *N*-glycosylamide carbohydrate–peptide bond, 155
Rhamnose, 3-*O*-methyl-, isolation from blood-group active proteoglycan of *Osmunda japonica* of, 320
Ricinus communis agglutinin, *N*-acetyllactosamine specificity, 233

Salmonella lipopolysaccharide, removal of ester-bound fatty acyl residues from, 225
Sialyl-x antigen, cancer associated, biosynthesis by (1→3)-α-L-fucosyltransferase of, 23
Soybean agglutinin, chemical modification of, 183

Tamm-Horsfall glycoproteins, structure of high-mannose oligosaccharide of, 327
Tn blood group glycoproteins from human carcinomas and erythrocytes, characterization and specific activity of, 271
Transferase, *N*-acetylgalactosamyl-, substrate specificity of, 259

UDP-*N*-acetyl-α-D-galactosamine: polypeptide, 259

Virus, of influenza, structures of the carbohydrate chains of the hemagglutinin of, 165
